Dear Colleagues,

It is my great honor and pleasure to invite you on traditional international Symposium 18th Mostar Psychiatric Saturday which will be held on June 4th, 2022 in hotel "Mostar" Mostar (Bosnia and Herzegovina) with topic "New Knowledge in Psychiatry: Multidisciplinary Approach".

Psychiatry as a medical profession as well as scientific discipline in last decades has a great progress giving to all of us opportunities to be more helpful and focused on people with mental disorders. Multidisciplinary approach is well-known and broadly adopted core principle for successful treatment and recovery. From this reason this year Symposium organizers invite speakers from other fields besides Psychiatry: psychologists, internal medicine specialists, pediatricians, ophthalmologists, nurses, radiologists and kinesiologists. Aim of their involvement in the Symposium is improvements of our knowledge and better understanding of different needs of our patients.

During the Symposium interesting lectures will be present with main task to show the newest trends of multidisciplinary approach in treatment of mental disorders for most adequate, comprehensive support to our patients in their road to recovery.

Look forward our meetings and wish you warm welcome in Mostar in June!

Professor Dragan Babić, MD, PhD
